

THOMPSON STREET PARTNERS WITH MANAGEMENT TO ACQUIRE FOCUSVISION

ST. LOUIS (January 29, 2013) — Thompson Street Capital Partners (TSCP), a private equity firm based in St. Louis, announced today that it has partnered with management to acquire FocusVision Worldwide, Inc. (FocusVision) of Stamford, Connecticut. Terms of the transaction were not disclosed.

FocusVision is the leading global provider of web-based video streaming, archiving and analytical solutions for the qualitative market research industry. Said Jim Cooper, Senior Managing Partner, TSCP, “We’re very excited to work with such a talented group. The FocusVision team successfully established the company at the forefront of a rapidly growing global market for web-enabled market research tools and we anticipate even greater growth going forward.”

FocusVision CEO Eric Grosogeat commented, “We are thrilled to partner with Thompson Street. They have a strong track record of providing strategic advice and investing in their businesses to help accelerate growth both organically and through acquisitions. We are confident that through this alliance, our clients, research agencies and facility partners can expect to see new and improved services to enhance the user experience and broaden our product suite.”

Thompson Street Capital Partners (www.tscp.com) is a St. Louis-based private equity firm that invests in service, distribution and manufacturing businesses via recapitalizations, management buyouts, corporate divestitures and family businesses in transition. Founded in 2000, TSCP has managed more than \$800 million in private equity capital and is currently investing its third fund. TSCP partners with management teams to increase value by accelerating growth, both organically and via complimentary acquisitions.

FocusVision (www.focusvision.com) is the leading global provider of live video transmission, analysis and archive solutions for the qualitative market research industry. With transmission solutions for all venues, including the largest global network of focus group facilities, FocusVision delivers the highest audio and video quality, reliability and security for the most advanced research organizations in the world. FocusVision has approximately 100 employees and offices in the US, the UK and Singapore.
